EXPERIENCE

Software Engineer, Mosaic Building Group; Chandler, AZ — 2019–2020

- Lead full stack developer on innovative construction worksheets (e.g. framing, electrical) using Javascript, React, Python, Node, Mocha testing framework, and Mongo DB.
- Implementation of worksheet enhancements led to a reduced need for skilled labor on job sites.
- Created tool to easily convert between web-based and print-based worksheets.

Software Engineer II, American Express; Phoenix, AZ — 2019

- Frontend engineer in the small business mobile app team using Javascript, React, SCSS, and Jasmine testing framework.
- Strong emphasis on behavior-driven development and continuous integration with an Agile development team.

Software Developer, General Motors; Chandler, AZ — 2015–2019

- Full stack development for the main brand websites owned by GM (Buick, Opel, etc.) using Adobe (AEM), Java, Javascript (Jquery, Angular), and Node (Gulp).
- Developed components for Adobe (AEM), created technical documentation for the use of those components, designed and implemented a lesson plan to train senior authors at MRM Frankfurt for opel.ie on site in Germany.
- Developed a system of internal documentation for front-end developers using Node.

EDUCATION

Northern Arizona University, Flagstaff, AZ — 2015

B.S. Mechanical Engineering

Minor, Mathematics
